OptiMATE

The Battery Saving Charger

OptiMATE is recognised as the most advanced battery saving charger & maintainer in the power sport industry, recommended by 10 motorcycle & leisure vehicle manufacturers. ***OptiMATE***'s unique long term battery care - interactive float charge and desulfating pulse alternating half-hourly with a rest / test period - has been proven to optimise battery power and life. ***OptiMATE*** charges all **12V** lead-acid batteries : **STD** (wet cell), sealed **AGM** (absorbed glass mat) and **GEL**. Hook it up and walk away, ***OptiMATE*** does the rest, automatically, safely, months or even years long .... *battery performance guaranteed!*

TM428

TM148

TM188

OptiMATE 2

4-stage smart charger & maintainer

Sealed weatherproof enclosure
0.8A constant current
2V low voltage start

Ideal for : 3 - 96Ah batteries

OptiMATE 4

7-stage smart desulphating charger tester & maintainer

Sealed weatherproof enclosure
0.8A constant current
2V low voltage start
2 desulfation stages
5 test results
Ideal for : 3 - 50Ah batteries

OptiMATE 6 ampmatic

9-stage smart desulphating charger tester & maintainer

Sealed weatherproof enclosure
0.4 to 5A ***Ampmatic***
2V low voltage start
3 desulphation stages
5 test results
Ideal for : 15 - 240Ah batteries

ACCUMATE 6/12

4-stage smart maintainer for 6 / 12V batteries

1.2A max. current
3V low voltage start
100% automatic
Ideal for : 5 - 96Ah

TM004

OptiMATE 4

DUAL PROGRAM TM148DP

PROGRAM 1: Direct to battery
PROGRAM 2: Key-less activation through BMW CAN-bus controlled 12V port, charge with optional TM-72 / TM-95 cable accessory.
More NEW features: battery test before charging, 0.5V low voltage start, additional pulse desulphation and absorption charge stage.

Cable accessories

TM 'white' connector used on OptiMate 4 & AccuMate 6/12

SAE 'O' connector used on OptiMate 2 & OptiMate 6
