Precision In-Line Fuel Filters

## Part No. 8419-XX-9909 (FF701C) Technical Specification

| Performance Properties                  | Typical Value                                                                                                    |
|-----------------------------------------|------------------------------------------------------------------------------------------------------------------|
| Hose Barb Size                          | 5/16"                                                                                                            |
| Fuel Line Recommendation                | 1/4"                                                                                                             |
| Flow Rate (gal/hr) w/ 3 1/2" Fluid Head | 7.0                                                                                                              |
| Average Micron Rating                   | 40-70                                                                                                            |
| Component Materials                     | Housing: Clear PET (E-85 compatible)<br>Filter Media: Sintered Porous Bronze<br>Cap: Clear PET (E-85 compatible) |
