

PERFORMANCE EXHAUST SYSTEM

APPLICATION

YEAR	MODEL
2013-2014	Honda CB500F
2013-2014	Honda CBR500R
PRODUCT	
1250020220	R77 SS Slip-On Exhaust with Carbon Fiber Sleeve; Carbon Fiber Endcap
1250020520	R77 SS Slip-On Exhaust with Stainless Steel Sleeve; Carbon Fiber Endcap

!	This product is designed for use in closed course racing and is not intended for highway use. In the state of California, it is illegal to modify the emission control system, which includes the fuel injection of any vehicle.
!	You must know how to remove and replace your stock exhaust in order to install this product otherwise have it installed by a professional mechanic. Keep all stock parts from your existing system as some components may be necessary to install your new Yoshimura exhaust depending on the application.
!	Read through all instructions before beginning installation. Exhaust system can be extremely hot. Let motorcycle cool down before beginning installation. Always wear hand and eye protection and take precautionary measures to avoid injury.

-TOOLS REQUIRED-

*Metric Socket Set • Combination Wrench Set • Torque Wrench
Metric Allen Wrench Set • Screwdriver*

-REMOVAL-

1. Loosen the stock exhaust clamp.
2. While securely supporting the muffler, remove muffler mount bolt and slide stock muffler toward the rear of the bike off of the stock header.

NOTE: Stock exhaust gasket will not be used with the Yoshimura Slip-On exhaust system.

-INSTALLATION-

1. Slide provided exhaust clamp over Yoshimura tailpipe.
2. Install rubber heatshield onto muffler clamp.
3. Slide clamp over Yoshimura muffler.
4. Slide Yoshimura muffler assembly over stock header outlet.
5. Align muffler clamp to stock muffler mount and install using stock bolt, stock washer, and stock nut. No not torque at this time. See diagram for proper orientation.

NOTE: Muffler clamp mounts to the inside of the muffler mount.

6. Torque exhaust clamp to 10 ft-lb (13.5 Nm, 1.3 kg-m).
7. Torque muffler mount bolt to 17 ft-lb (23 Nm, 2.3 kg-m).
8. Before starting motorcycle, check for proper clearance between new exhaust system and rear suspension (i.e. tire, swing-arm, brake, rear shock, engine, and etc.) If any problem is found, please carefully follow through the installation steps again. If problem still persists, please call Yoshimura Tech Department at (800) 634-9166 / in CA (909) 628-4722.
9. It is recommended that the muffler and tailpipe be wiped down with rubbing alcohol to remove oil and fingerprints. This will help prevent tarnishing of the finish after the exhaust is heated up.
NOTE: After starting motorcycle, it is normal for new exhaust system and muffler to emit smoke until oil residue burns off.
