

# PIRELLI INFORMATION SHEET TIRE CASINGS

## MTB CASINGS

**LITE MTB**  
The lightest 120tpi MTB construction in our range, suited for fast, modern cross-country application

**PRO WALL**  
The reinforced MTB casing developed for cross-country, marathon, downcountry and light trail application

**HARD WALL**  
The Enduro specific casing, it features a hard-rubber insert in the sidewall for greater support and stability at low inflation pressure

**DUAL WALL**  
The racing-ready enduro carcass

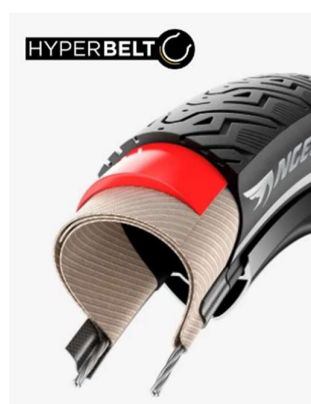

**DUAL WALL+**  
The downhill and enduro racing carcass chosen by the PROs

## E-MTB CASINGS

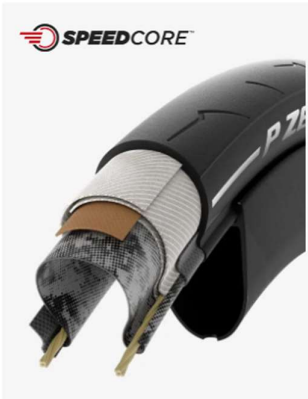

**HYPER WALL**  
The 60tpi E-MTB specific construction that provides greater protection against pinch-flats and better weight support thanks to a special feature derived from motocross

## URBAN CASINGS

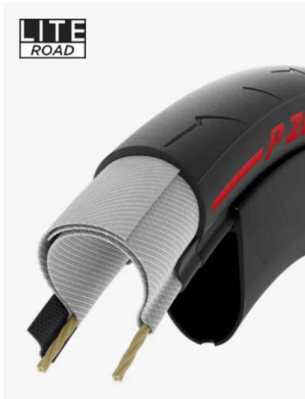

**HYPERBELT**  
The special construction dedicated to urban bikes made of a cut-resistant Nylon carcass paired with a 5mm layer of rubber for extra puncture protection

### ROAD CASINGS

**SPEEDCORE**  
Cutting-edge TLR 120 tpi casing technology with an inner layer of aramid compound plus an aramid breaker

**LITE ROAD**  
The 120tpi LITE casing is designed to achieve the maximum speed and suppleness: a lightweight carcass that enhances the riding experience.

**TECHLINER ROAD**  
The 120tpi TechLINER is a tubeless casing technology constructed with an inner rubber layer for maximum pressure retention which allows you to go fast or while being comfortable and reliable.

**TECHWALL+ ROAD**  
The new 60tpi TechWall+ Road Casing is designed to last longer; high reliable and durable structure without compromising its rolling resistance efficiency.

**TECHWALL ROAD**  
The lightest 120tpi tubeless-ready carcass for P ZERO™: superior speed and suppleness compared to any other Pirelli road tubeless-ready construction

**TECHBELT ROAD**  
The 120tpi tube-type road carcass for P ZERO™ with the addition of a layer of antipuncture fabric that doesn't affect the suppleness and the racing feeling

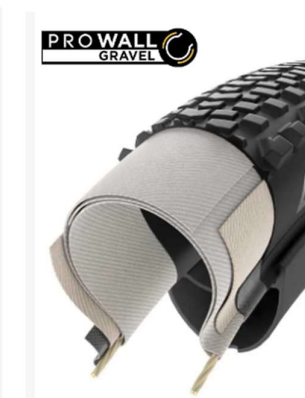

**ARMOUR TECH™**  
The patented 60tpi tubeless-ready construction that was made for training, endurance and fast commuting. A reference for puncture resistance.

### GRAVEL CASINGS

**TECHWALL GRAVEL**  
The 120tpi tubeless-ready gravel-specific casing; provides optimal riding feeling without compromising on puncture resistance thanks to anti-cut fabric

**PROWALL GRAVEL**  
The 60 tpi tubeless-ready gravel-specific construction; with sidewall protection meant to resist later cuts on different surfaces.

**TECHWALL X GRAVEL**  
The 60tpi tubeless-ready gravel-specific casing; provides an increased puncture protection thanks to an additional bead-to-bead anti-puncture fabric
