**PRAKTIKA**

Tire without a stripe: optimal choice for everyday recreational riding in all terrain conditions.

**SUPER**

Identified by the characteristic yellow stripe: medium carcass construction and compound, especially designed for high speed Enduro, ideal in hard dry conditions.

FAST ENDURO

**SUPER FAST**

Identified by the characteristic yellow and purple stripe: medium carcass construction and compound with improved and narrower cross section design, especially designed for high speed Enduro races in dry and hard conditions

FAST ENDURO

**SUPER LIGHT**

Identified by the characteristic green stripe: light, soft carcass construction and gummy compound, especially designed for medium speed technical Enduro, ideal in wet slippery conditions.

TECHNICAL ENDURO

**ULTRA LIGHT**

Identified by the characteristic green and purple stripe: light, soft carcass construction with narrower cross section design and gummy compound, especially designed for medium speed technical Enduro, ideal in wet/semi wet and slippery conditions.

TECHNICAL ENDURO

**SUPER SOFT**

Identified by the characteristic double green stripe: light carcass construction with ultra gummy compound, especially designed for low speed extreme Enduro, ideal in wet slippery conditions.

XTREME ENDURO

**SUPER SOFT PRO**

Identified by the characteristic double green and purple stripe: extremely lightweight, ultra-flexible carcass with an ultra-gummy compound provides an increased contact patch for excellent grip in challenging, low-speed technical sections.

XTREME ENDURO
